DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 37-38 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 3 of U.S. Patent No. 6,394,606. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claims are a broader recitation of the elements of the patent. Claim 38 corresponds to patented Claim 3 as regards a polarization separation element.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 2851

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 37-38 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 37 is indefinite because the equation contains no numerical value or definition for "A". Without such any optical element will read upon such equation.

Claim 38 is indefinite because of the use of the expression "and/or" obscures the metes and bounds of the claim.

Allowable Subject Matter

5. Claims 9, 11, 13, 15, 16 are allowed.

6. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or suggest a combination having polarization conversion means preceeding a polarization beam splitter having a polarization separation plate element formed on it's incident or emission face. Such a combination increases light efficiency and contrast.
